

Suppl 6. Meta-regression for an association between the cardiotoxicity prevalence in capecitabine users and demographic data (age, cumulative dose, place of study, sex, and year of study).

Variables	Omnibus P-value
Age	0.833
Cumulative dose	0.221
Place of study	0.001*
Sex	0.579
Year of study	0.460

*Significantly different at $P < 0.05$.
